

5-HT4 Receptors in the Brain and Periphery (Biotechnology Intelligence Unit)

This book provides a comprehensive, up-to-date review of the distribution, pharmacology and physiology of central 5-hydroxytryptamine (5-HT)₄ receptors. The 5-HT receptor subtypes exhibit a unique pharmacology, distribution and function, of which the 5-HT₄ receptor has been one of the most intensively studied in recent years, both from a basic research standpoint and as a target for novel therapeutics.
