

Flavor Chemistry: Industrial and Academic Research (ACS Symposium Series)

This book presents the first collaboration between the ACSs Division of Agriculture and Food Chemistry and the Institute of Food Technologists. The latest developments in flavor chemistry, including new research in reaction flavors, encapsulation techniques, flavor formations via lipids, flavor analysis, and challenges in flavoring nutraceuticals, are presented in papers from leading workers in these fields. This collection investigates many of the current topics in flavor chemistry and will be a welcome contribution to this fascinating science.
