

## Advances in Protein Chemistry and Structural Biology: 78

Published continuously since 1944, the Advances in Protein Chemistry and Structural Biology serial has been a continuous, essential resource for protein chemists. Covering reviews of methodology and research in all aspects of protein chemistry, including purification/expression, proteomics, modeling and structural determination and design, each volume brings forth new information about protocols and analysis of proteins while presenting the most recent findings from leading experts in a broad range of protein-related topics. This eclectic volume features articles on a variety of topical subjects. Includes new information about protocols and analysis of proteins Eclectic volume presents chapters by a wide range of leading experts Presents new, cutting-edge information that will serve as an essential addition to any bookshelf or laboratory
