

# The Baltic States: The National Self-Determination of Estonia, Latvia and Lithuania

The Baltic States examines the struggles of the Baltic peoples for national self-determination. It is divided into two parts. Part one explores their nationalist awakening, how the realization of national self-determination during the inter-war years of independent statehood manifested itself, and the impact that fifty years of subsequent incorporation into the Soviet Union has had on Baltic politics and national cultures. Part two examines the nationalist reawakening in the late 1980s, the re-establishment of Baltic national self-governance in 1990-91 and the problems that these countries now face as sovereign entities.
