

Developments in Natural Intelligence Research and Knowledge Engineering: Advancing Applications (Premier Reference Source)

Thought, comprehension, and intelligence are everyday concepts that are so pervasive through the lives of every human being that people scarcely think about them at all. These processes are so complex under the surface, however, that a fully developed scientific discipline is necessary to explore these topics. *Developments in Natural Intelligence Research and Knowledge Engineering: Advancing Applications* covers the intricate worlds of thought, comprehension, intelligence, and knowledge through the scientific field of Cognitive Science. This groundbreaking reference contains research from global experts, covering topics that have been pivotal at major conferences covering Cognitive Science topics.
