

Co-management Approach to Marine Fisheries in Oman: Traditional Small Scale Fishery in Oman

This book is very useful for researchers in fisheries in general and for management and socioeconomic studies in specific. In addition, the book is good for the co-management officers and good for the policy makers in Oman and nearby countries in the Middle East and East Asia. The book contains information about the fisheries sector in Oman in details. Also, it contains literature in sustainability from economic view, fisheries management aspects and measures. The practice of co-management as well is covered in wide manner. The findings definitely provide many answers for many socioeconomic and management issues related to most of the fisheries sectors.
