

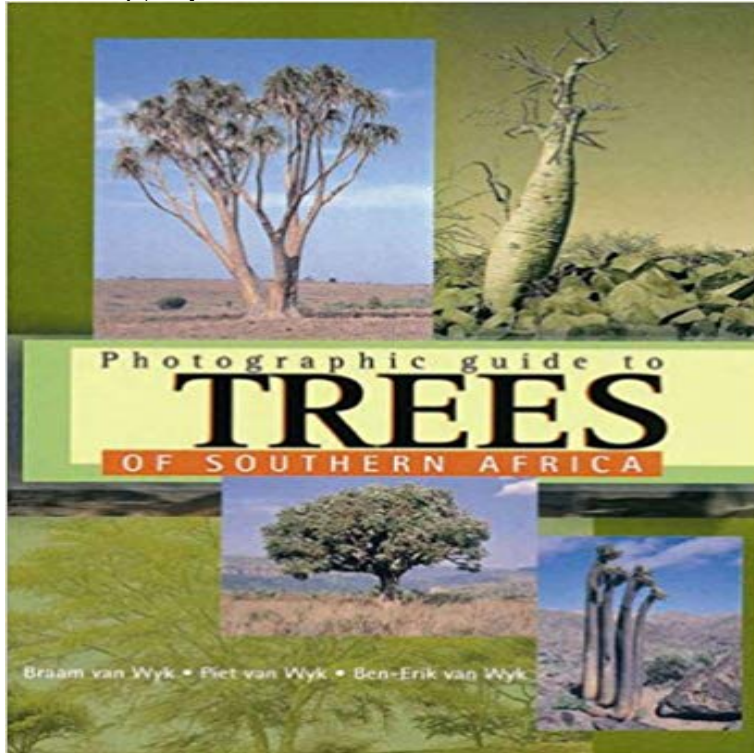

Photographic Guide to Trees of Southern Africa

Photographic guide to trees of Southern Africa is an identification and reference guide to 300 of the more common tree species in the region, both native and naturalised. Features of the title include: Descriptive species accounts highlighting the most important field identification characters. More than 950 photographs illustrating in particular the growth form, but also the flowers, fruit and bark of the various species. Distribution maps. Habitat preference of each species. Reference to similar and closely related species. A series of icons giving the reader certain information about a specific tree at a glance. An innovative, easy-to-use identification guide to narrow down the possible species to which an unknown tree may belong.
