

# Handbook of Adhesives and Sealants: Basic Concepts and High Tech Bonding: 1

This is the most comprehensive Adhesives and Sealants Handbook ever published, with the cooperation of around 35 authors from all over the world each one a specialist in their field. It will include 80 chapters dealing with general information, theory of bonding and sealing, design of bonding parts, technical characteristics, chemistry, types of adhesives, application, equipment, controls, standards etc. Industrial applications such as automotive, aeronautics, building and civil engineering, electronics, packaging, wood, furniture, metals, plastics and composites, textiles, footwear etc.\* Over 1,000 real-life examples illustrate the dos and donts of using adhesives\* Every scientific and technical issue concerning every chemical type in every industry\* Designed to help solve problems quickly, the content is structured to allow readers to navigate this comprehensive resource in 4 different ways
