

The Jarrah Forest: A complex mediterranean ecosystem (Geobotany)

The Western Australian jarrah forest is unique, containing some of the most beautiful flora in the world, more than 100 species of birds and some 50 mammals indigenous to this State. This book *The Jarrah Forest - A Complex Mediterranean Ecosystem* is a collection of scholarly essays on every known aspect of the northern part of the jarrah forest extending from south of Collie to the Avon River. All of the work has been researched by members of tertiary institutions, the private sector and government instrumentalities and was prepared expressly for this book. In the list of contributors are the names of many Western Australians who are in the forefront of their particular field. The book will be a very important reference work for senior secondary schools and tertiary institutions in Western Australia for many years to come. Additionally, it will have wide appeal to all interested in forestry management, both in Australia and overseas. I should like to express my appreciation for the efforts of all those involved in the conception and planning of this most valuable book. Perth, August 1988 Peter Dowding LL.B. M.L.A.
