

Fragmentary Classicising Historians of the Later Roman Empire, Volume 2: Text, Translation and Historiographical Notes (Arca Classical and Medieval Texts, Papers and Monographs (Paperback))

This volume is the much larger companion to Roger Blockleys similarly-titled monograph, published in 1981 (ARCA 6). The earlier volume gave a commented conspectus of the fragments, and essays on the individual historians. In vol. II the texts themselves are printed, with English translations and historiographical notes. Included also is a correlation of Blockleys order with the older numbering of Mueller, Dindorf and Niebuhr, and indices of names, places, quotations and citations. This work, with the earlier monograph, has become a standard for the increasingly important study of the later Roman Empire.
