

## History As Art and As Science: Twin Vistas on the Past (World perspectives)

Professor Hughes offers an earnest warning: Unless there is some emotional tie, some elective affinity linking the student to his subject of study, the results will be pedantic and perfunctory. In other words, it is only a step from the sublime to the meticulous. Those eager to guard against that sad descent will find History as Art and as Science a guide, a tonic, and an inspiration. Its short, electrifying essays are so magnificently sane and persuasive they should be required reading for every student who contemplates a major in history. Geoffrey Bruun, Saturday Review
