Upstart Business Consulting Group creates comprehensive business plan kits for a variety of businesses and industries. When you purchase one of our business plan kits, you will have access to the tools that will allow you to be an entrepreneur. We only create business plan kits for businesses that can capitalize on current trends and consumer demand. All businesses we cover require an initial start-up capital investment of \$1,000 to \$10,000. Although the required start-up capital is relatively small, you will have the potential for substantial cash flow and a high return on investment. The format of the business plan kits are modeled after business plans that have been used in successful start-up companies. These business plan kits are for those individuals who want a better work/life balance, flexibility, pride, and fulfillment that come with being an entrepreneur.
