

## In Memory of D Allan Bromley: Nuclear Scientist And Policy Innovator

This book covers two aspects of the career of D. Allan Bromley: the scientific policy aspect and the scientific aspect. In the first half of the book, contributions from Governor John Sununu, former White House Chief of Staff under President George H. W. Bush; Neal Lane, former Science Adviser to President William Clinton; John Marburger III, Science Adviser to President George W Bush; and Mary Good, former Undersecretary of Commerce, highlight the role of Bromley as Science Adviser to President George H. W. Bush and a maker of science policy in the second part of the 20th Century. This part is of interest to science policy scholars, historians, and young persons wishing to start a career in science policy. In the second half of the book, articles by directors of laboratories and leading scientists discuss future programs in all areas of nuclear physics - low-energy, medium-energy and high-energy - to which Bromley greatly contributed, in the USA, Europe and Japan. This part of the book is of interest to all researchers in the field of nuclear physics, as it provides a comprehensive but succinct overview of the field and indicates directions for future research in the first part of the 21st century.
