

## International Review Of Cytology, Volume 247: A Survey of Cell Biology (International Review of Cell and Molecular Biology) (Vol 247)

International Review of Cytology presents current advances and comprehensive reviews in cell biology both plant and animal. Authored by some of the foremost scientists in the field, each volume provides up-to-date information and directions for future research. Articles in this volume address cellulose metabolism in plants; survivin: a protein with dual roles in mitosis and apoptosis; hypothalamic tanycytes: a key component of brain-endocrine interaction; short retroposons (SINEs) in eukaryotic genomes; plant genome analysis: the state of the art.
