

Introduction to Political: Science; Two Series of Lectures (Classic Reprint)

Political Science regarded not merely as a subject cognate to history, for which the study of history is a preparation, but as a method of studying history itself formed for many years an important part of the teaching given by the late Sir John Seeley as Professor of History in Cambridge. Usually, however, this instruction was given not in formal expository lectures, but in a weekly conversational class. His manner of conducting this class has been clearly described by one who attended it Mr. J. R. Tanner in the English Historical Review for July 1895 (p. 512). I quote a portion of his description :H is old pupils carry with them grateful recollections of his Conversation Class. The subject was political science studied by way of discussion, and discussion under the reverential conditions that prevailed resolved itself into question and answer Socrates exposing the folly of the Athenians. It was mainly an exercise in the definition and scientific use of terms. What is liberty? Various definitions of the term would be elicited from the class and subjected to analysis.(Typographical errors above are due to OCR software and dont occur in the book.)About the Publisher Forgotten Books is a publisher of historical writings, such as: Philosophy, Classics, Science, Religion, History, Folklore and Mythology.Forgotten Books Classic Reprint Series utilizes the latest technology to regenerate facsimiles of historically important writings. Careful attention has been made to accurately preserve the original format of each page whilst digitally enhancing the aged text. Read books online for free at www.forgottenbooks.org
