

Lesbian Geographies: Gender, Place and Power

It has long been recognised that the spatialisation of sexual lives is always gendered. Sexism and male dominance are a pervasive reality and lesbian issues are rarely afforded the same prominence as gay issues. Thus, lesbian geographies continue to be a salient axis of difference, challenging the conflation of lesbians and gay men, as well as the trope that homonormativity affects lesbians and gay men in the same ways. This volume explores lesbian geographies in diverse geographical, social and cultural contexts and presents new approaches, using English as a working language but not as a cultural framework. Going beyond the dominant trace of Anglo-American perspectives of research in sexualities, this book presents research in a wide range of countries including Australia, Argentina, Israel, Canada, USA, Russia, Poland, Spain, Hungary and Mexico.
