

Grain of Hope: A Short Story

This is a true story of very young mothers struggle desperately trying to handle her sons who were born with debilitating rare diseases; it is about their fight to overcome severe birth defects and life-threatening surgeries and ultimately how she dealt with their death. It is a profound illustration of the resiliency of the human spirit when it is severely tested by random acts of emotionally painful experiences. It was an inconceivable life event, Much like most tragedies or crises they boggle the mind, leaving panic and despair in their path. Your world is forever altered by the effects. Emotions or feelings can become so low that people fall victim to an entire life scarred by depression and grief. Unfortunately, some scars never heal, often becoming reasons for addictions, obsessions, and even crime, threatening ones sanity, making it very difficult to live a normal life. Depression has a way of producing consuming dark, negative thoughts. These thoughts are like weeds growing out of control in your mind choking out all of the hope within you. When life becomes so burdensome you wonder if life is really worth living. As you reach the tip of your breaking point, most often you face a critical decision. Do I want to continue to hang on and try to survive this ordeal, or should I give up and surrender my mind and body to destruction? Sad to say, the breaking point is where this mother lived for the better part of her life. Yet, she prevailed! Instead of it destroying who she was, it defined her even more. It is an excellent read for anyone suffering-in-silence finding it too difficult to live with anxiety, depression, pain or grief because of a death or loss. It is a must read for parents who are trying to make sense and deal with the death of a child and for children struggling with loss rather it be a friend, pet or one or both parents. Grain of Hope will encourage, empower and give hope to what often is a

helpless and hopeless situation.
