

## Protein Phosphatases, Volume 366 (Methods in Enzymology)

Protein phosphatases are a group of enzymes responsible for the dephosphorylation of various proteins and enzymes in a cell. This role is an extremely important one since protein phosphorylation and dephosphorylation is required for the regulation of a large number of cellular activities.

\* Classification of Protein Phosphatases\* Analysis/Technology: Cell and Molecular Imaging Technology, Assay of Protein Phosphatases, MS and MNR, Genomics/Proteomics, cDNA Microarray Analysis\* Cellular Regulation: Substrates, Inhibitors, Regulation, Protein-Protein Interaction\* Biological Function: Antisense Studies, Transgenic and Knockout Animal Models in Vivo, Therapeutic Approaches
