

## Oaks of Asia

The monograph gives an account of the systematics, geographic distribution, ecology, phytocenology, and evolution of oaks of the extensive forests of Asia. It is the first taxonomic, ecological, and phytocenological review of all the presently known oaks of the Asian continent and may be used as a reference by botanists, geographers, ecologists, and specialists in forestry and plant introduction. Contains bibliography of 860 citations and 163 illustrations.
