

ISO 11787:1995, Machinery for agriculture and forestry - Data interchange between management computer and process computers - Data interchange syntax

Provides the means to enable communication between on-farm process computers of stationary and mobile agricultural equipment or machinery, and management computers. Specifies an Agricultural Data Interchange Syntax (ADIS) to exchange data electronically. It implies that the syntax is not intended for real-time data exchange. This title may contain less than 24 pages of technical content.
