

# Proceedings of the 1972 Biennial Meeting of the Philosophy of Science Association (Boston Studies in the Philosophy and History of Science)

This book contains selected papers from symposia and contributed sessions presented at the third biennial meeting of the Philosophy of Science Association, held in Lansing, Michigan, on October 27-29, 1972. We are grateful to Michigan State University, and especially to Professor Peter Asquith and his students and colleagues, for their friendly and efficient hospitality in organizing the circumstances of the sessions and of the intersessions, the unscheduled free time which is so important to any scholarly gathering. Several of the symposium papers have unhappily not been made available: those of Alasdair MacIntyre and Sidney Morgenbesser in the session on the social sciences, that of Ian Hacking in the session on randomness and that of Imre Lakatos in the session on discovery and rationality in science.
