

The Universe is God

The book is a monologue that tries to capture the likely forms of God. The basic idea is that the universe is God Himself, as a conscious physical entity whose conscience summarizes our consciences. We managed to sustain this universal consciousness. The galaxy is just a cell of the immense being and billions of stars are mitochondria that give energy to the Universe God. Its a book about perception which includes essays on various topics discussed and analyzed by humans for thousands of years .A more forceful and sincere expression of an author who lives on a speck of dust in the universe, fascinated by the exponential evolution of human consciousness. Virtual origin of the universe is reasoned . Its a book that tries compatibility between evolution and creation in that God Himself is created by evolution
