Read this book on any device Have you achieved the level of success you envisioned for yourself? If not do you know what it takes to get there? Inside this book I take you inside the mind of the worlds top achievers. Learn what it takes to produce excellence. Everyone has dreams but feelings of fulfillment develop when we bridge the gap between dreams and goals. A deserved sense of self accomplishment is a feeling everyone strives to attain. Which brings the question are you going about it the right way? Most people are shocked to learn to just how close they actually are to getting on track towards reaching our potential. Ive also found that the biggest barrier amongst most people is a lack of confidence in themselves. Fear and a lack of certainty are our greatest enemies when attacking a worthwhile goal. For some of us the problem isnt to start on a goal its sticking with it. A common misconception is that it takes 21 days to build a new habit. While this is moderately true it is only referring to soft goals like making sure to make our beds every day or eating dinner at a particular time. Goals that are more along the lines in the delayed gratification region takes quite a bit more dedication, but not as much as you would think. Research shows that it takes 66 DAYS to rewire your brain with a new habit. This simply means that whatever you set out to achieve it has the potential of becoming second nature to you in only a matter of a couple months. Do you have a couple of months to dedicate to the rest of your life? If youre reading this book I sure hope so! Take a Look at whats Inside Who Are You? You Have What It Takes A Great Life Awaits You What To Do When Disheartened Aiming Higher And Better Every Time You Will Succeed I
