

## Spiritual Intelligence at Work, Volume 5: Meaning, Metaphor, and Morals (Research in Ethical Issues in Organizations, Volume 5) (Research in Ethical Issues in Organizations, Volume 5)

This volume contains articles and essays from internationally renowned authors and thinkers about the relationship among business, business ethics, religion, and spirituality. The authors included in this book represent multiple perspectives including Christian, Jewish, Hindu, philosophical, and others. who promote a contemporary re-integration of business and religious values and for those concerned about the dangers inherent in this project. the only justification for going back home again to traditional religious texts is to help us all move forward together. If the real reason were invoking religion in the public sphere is to strengthen our own religious communities and our own identities as members of particular religious communities, we are making a fundamental error in judgement. The goal of a legitimate religiously grounded business ethics can and must be the desire to critique, enhance, and strengthen the democratic values and institutions of society including business. These values include noncoercion, transparency, equal rights, pluralism, compromise, individual and communal responsibility, and many others.
