

Systems Analysis in Forestry and Forest Industries (Tims Studies in the Management Sciences, Vol 21)

Volume 21 of the Studies in the Management Services series, presenting a variety of articles revealing the state of the art of applications of systems analysis techniques to problems of the forest sector. Issues covered include the dynamics of the forest ecosystem, optimal forest management, the roundwood market, forest industrial strategy, regional and national forest sector policy as well as international trade in forest products.
