

## New Narratives in Eighteenth-Century Chemistry: Contributions from the First Francis Bacon Workshop, 21-23 April 2005, California Institute of Technology, Pasadena, California (Archimedes)

The eighteenth century has long been considered critical for the development of modern chemistry, yet many features of the period remain largely unknown or unexplored. This volume details new approaches and topics to build a more complex view of chemical work during the period. Themes include late-phase alchemy, professionalization, chemical education, and the links and relations between chemistry and pharmacy, medicine, agriculture, and geology.
