

The Emergence of Detente in Europe: Brandt, Kennedy and the Formation of Ostpolitik (Cold War History)

This book examines the key relationship between Willy Brandt (the former Mayor of West Berlin and future West German Chancellor) and the administration of President John F. Kennedy. Arne Hofmann focuses on the administrations influence on the development of Brandts policy of small steps and the formation of his later Ostpolitik, the centrepiece of European detente. Brandts interaction with the Kennedy administration is traced through the Berlin Wall crisis of 1961, together with Kennedys search for a modus vivendi based on the status quo, the 1962 crisis in German-American relations, Brandts disillusionment campaign, the development of his programmatic statements, Brandts three meetings with the President including Kennedys famous visit to Berlin, the limited nuclear test ban treaty and Brandts Berlin pass agreement of Christmas 1963. While the narrative focuses on the gradual change in Brandts position, systematic parts concentrate on Brandts and Kennedys detente concepts, the triangular relationship between West Berlin, Washington and Bonn with its implication for domestic politics, and the role of images, campaigning and public opinion. The Emergence of Detente in Europe will appeal to students of Cold War history, foreign policy, international relations and international history in general.
