

The Nazi Dictatorship (RLE Responding to Fascism)

Faced with a political movement that was effectively unparalleled many observers found it extremely difficult to work out exactly what kind of regime they were dealing with: whose interests did it serve? First published in 1934, The Nazi Dictatorship argues both that the Nazi regime represented a clear break from pre-War Prussian militarism and that it was not a passing fad. It describes a State of Monopoly Capitalism in which large scale industrial and financial interests are paramount.
