

The Zebrafish: Genetics, Genomics and Informatics: 135 (Methods in Cell Biology)

This volume on genetics, genomics, and informatics, will cover new technologies in forward and reverse genetics, transgenesis, the zebrafish genome and mapping technologies, informatics and comparative genomics, and Infrastructure. This volume of Methods in Cell Biology will prove valuable both to seasoned zebrafish investigators as well as to those who are newly adopting the zebrafish model as part of their research armamentarium.
