

Skin Barrier: Chemistry of Skin Delivery Systems

Gain a wider perspective on what a skin delivery system really is and how to create one. *Cosmetics & Toiletries*, the international magazine of cosmetic technology, is the cosmetic and personal care industry's preferred destination for the latest information on formulations, new technologies, ingredients, testing and news. *Cosmetics & Toiletries* is the first-read industry magazine for cosmetic chemists, R&D management, and key to the development of new formulations and product concepts. Pulling from its most popular articles written by world-renowned experts, *Skin Barrier: Chemistry of Skin Delivery Systems* delivers the same quality and international appeal as the magazine. This informative collection of articles covers a variety of topics to create a solid foundation of knowledge about skin delivery systems in the cosmetics industry. Topics include: Basics of skin penetration, Skin barrier maintenance and repair, Measurement techniques, Emulsions as delivery systems, Vesicles as delivery systems, Silicones, And more! This thorough collection provides professionals with invaluable knowledge from well-known experts. Rachel Chapman, Senior Editor, *Cosmetics & Toiletries* magazine.
