

## The Song of the Spinning Sun: A True Story

Mary was a free thinker. a compass influenced by a million distracting metal parts. Her needle veered haphazardly, pointing nowhere in particular. But on 23rd April 1978, at around two minutes past five, she found the magnetic North - and went from nowhere to God in 30 seconds. The sometimes funny, sometimes spectacular and often moving events that followed have been shaping her life ever since. Those events are still happening and, 30 years later, she is still amazed.
