

Whatre the Odds

This is the story of how the influence of a Father's memory shapes his son's life in guiding him how to be a great human being and to help others reach their success. Unfortunately, there are several times when crisis and death had taken away those Frankie Traineo loved the most. Finally, this last crisis had such an effect on his life he no longer could see any reason to go on. The mysterious old man keeps reappearing to him during these critical times in his life; telling Frankie that he has much work to do for those who are coming that need him and explains to him how he is going to have a meaningful impact on many lives. And then this one day two orphaned children show up at his front door step that changes his life forever.
